

YOUNG AT HEART

HAPPY CATS - WHITEPAPER

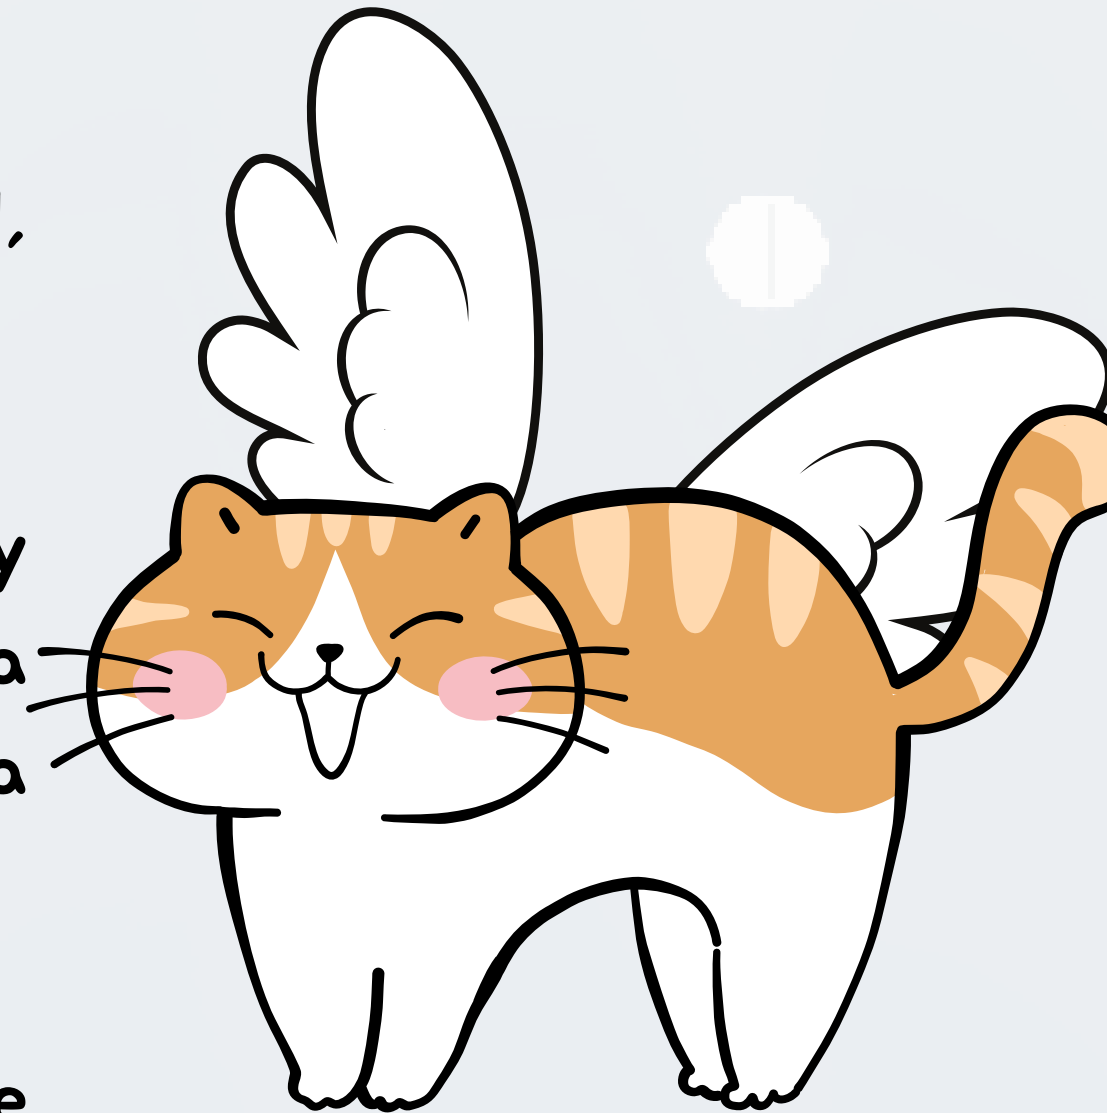

About

Inspired by the 'Happy Happy Cat' viral meme, our own 'Happy Cat' has arrived. The days of Dogs, Pepes are over. It's time for our 'Happy Cat' to take over the Web3 world.

Happy Cat is not just a meme project. We are bringing the best of AI, Metaverse, and Defi together.

Our mission is to make 'Every Cat Happy'. With that being said, Charity is something we all strongly believe. Hence, we will be donating a significant amount of money to Cat Shelters around the world on a regular basis.

Let's vibe and get along on this fun & exciting journey with a noble cause.

Tokenomics

Total Token Supply – 88,000,000,000 (88 Billion)

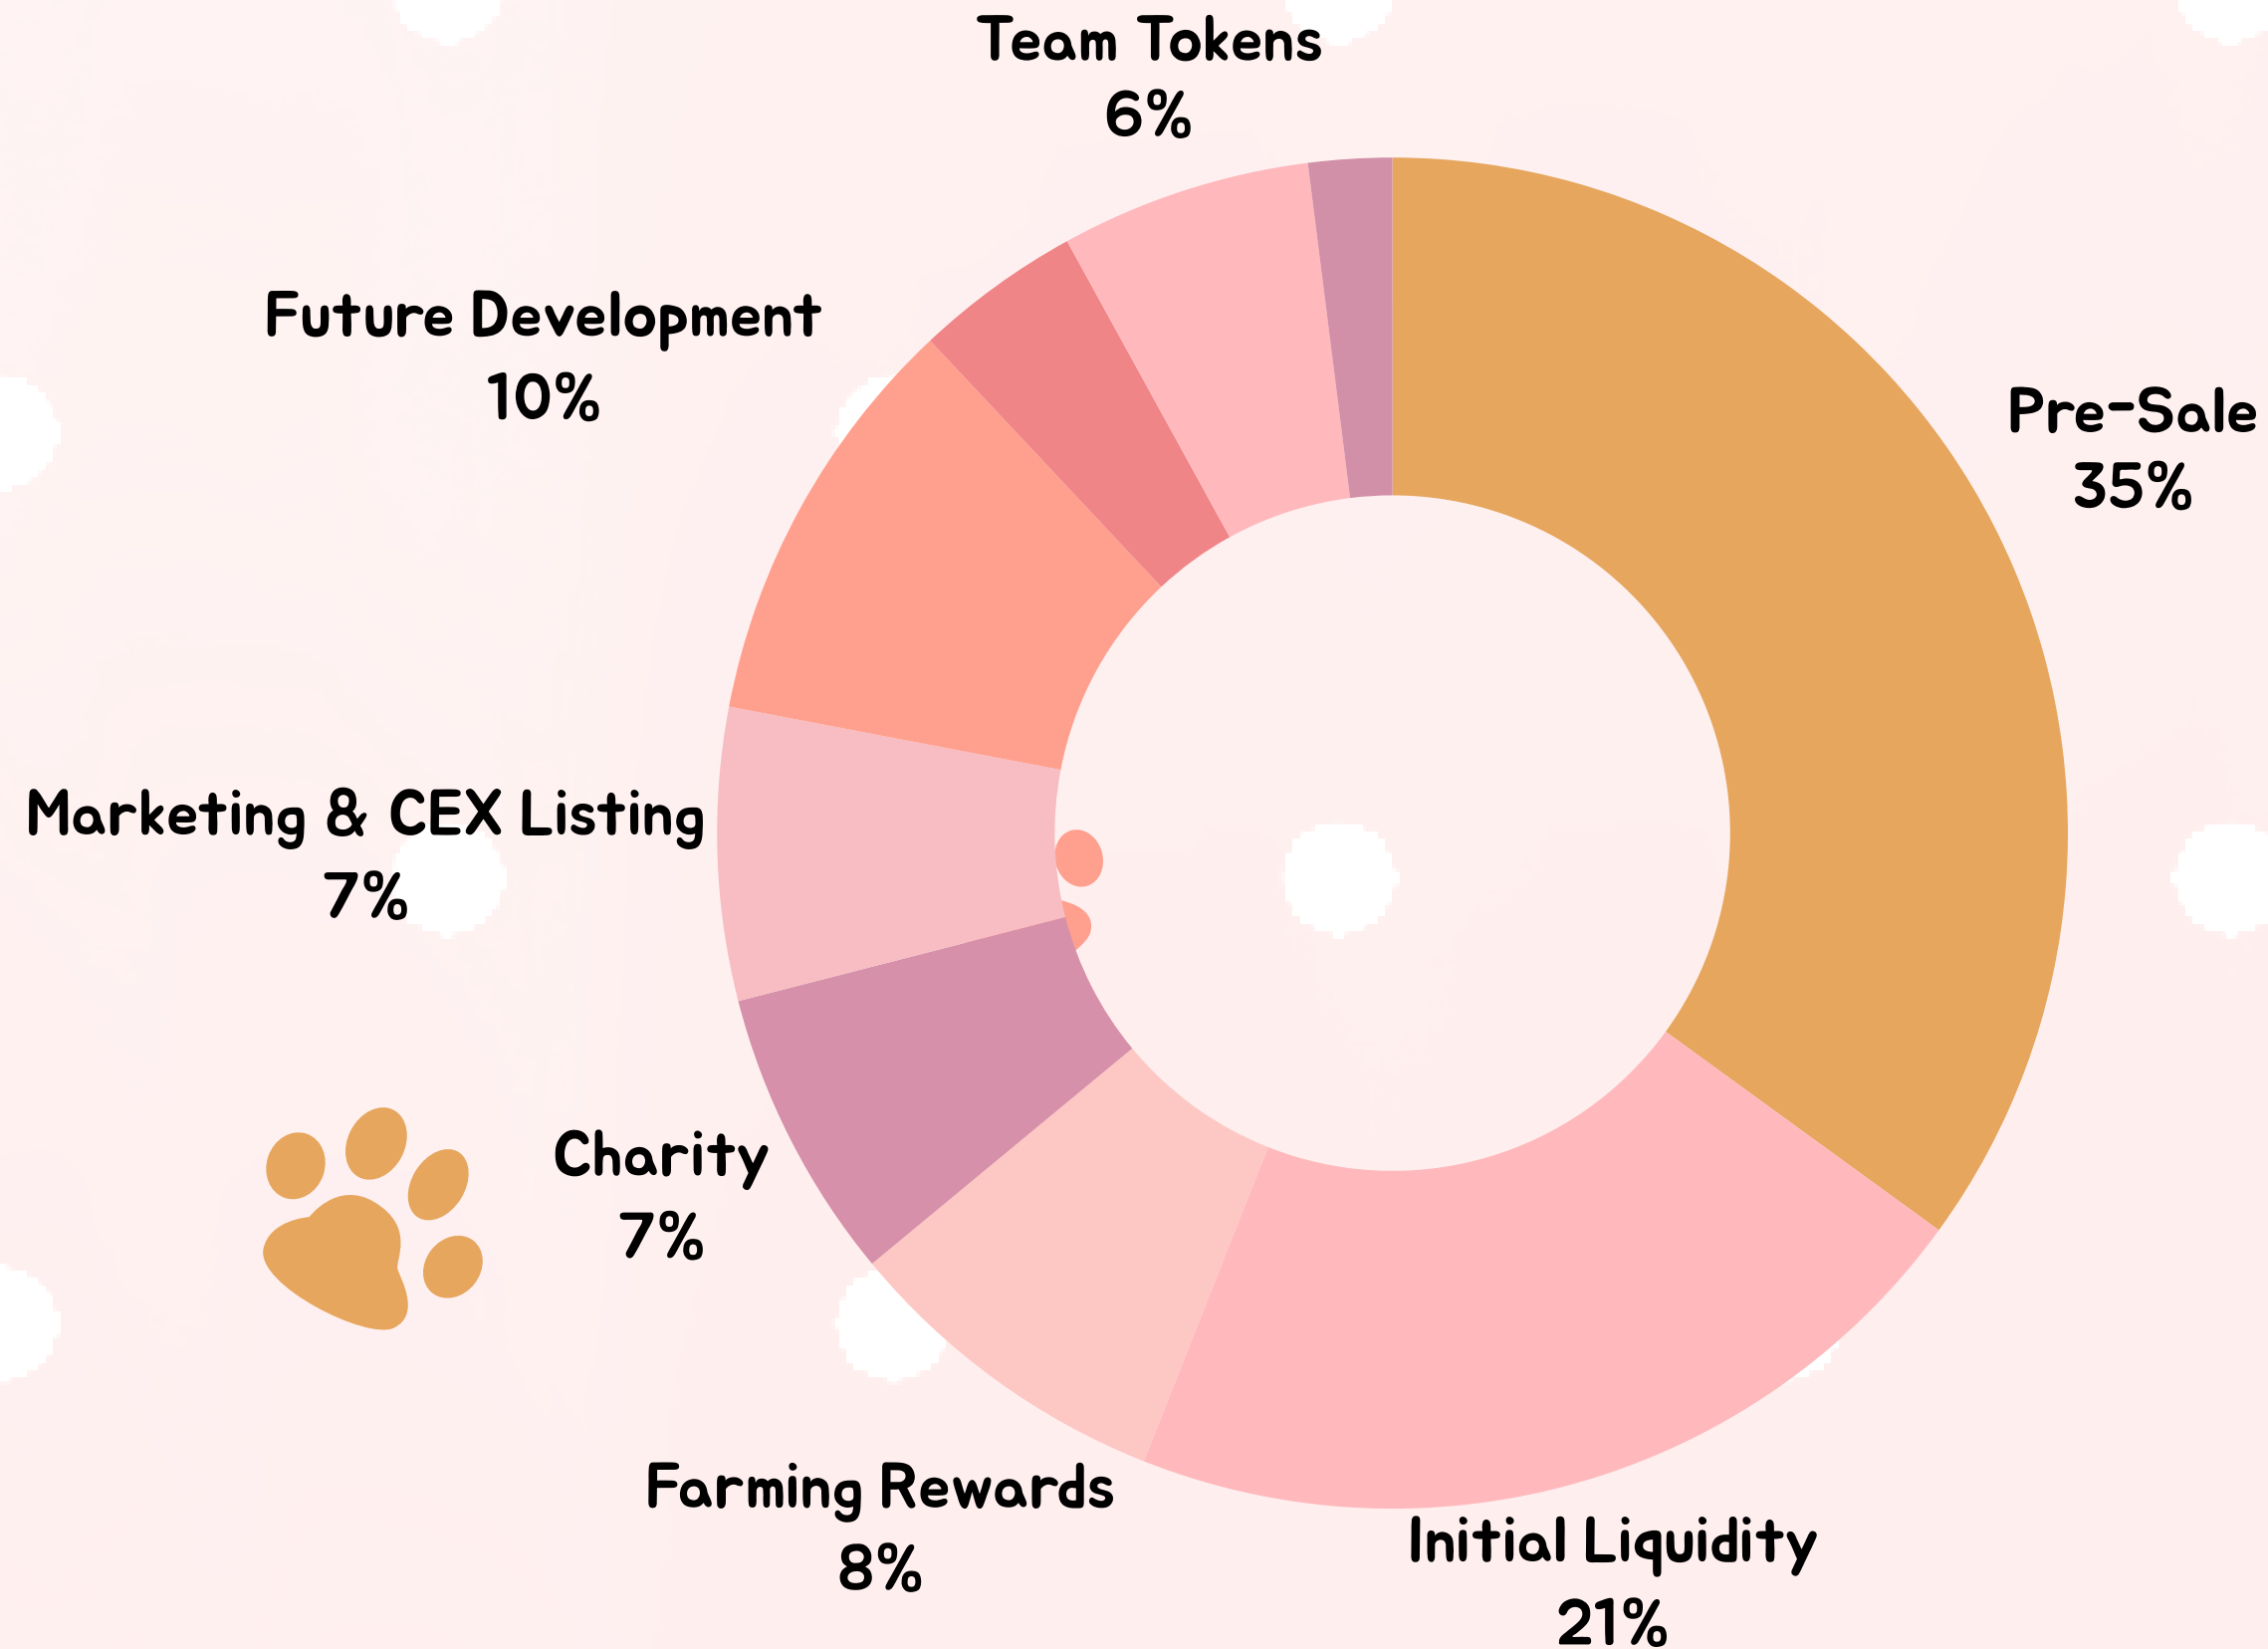

The number 8 is an extremely lucky number in some numerology. It represents prosperity and completeness.

The number 88 is especially popular in some cultures because of the double eights but also because of its visual similarity to the sign for double happiness: 囍 囍

Happy Cat will also be a highly deflationary Token. The Team will buyback tokens from open market and burn on regular basis.

Tokenomics Details

Tokenomics Details

- Presale – 35% of Total tokens will be available for Whitelisted Pre-sale.
- Initial Liquidity – 21% of Total Tokens, we plan to add more liquidity in future
- Staking & Farming Platforms – 8% of total supply will be set as Rewards
- Charity – 7% of total supply is kept aside for Charity and Donations
- Marketing & CEX Listing – 7% of total supply for Marketing and CEX Listing.
- Future Development – 10% is kept aside for all future Product Developments.
- Community Rewards & Airdrops – 4% is kept aside for rewards.
- Team Tokens – 6% is kept aside for the entire Team

Roadmap

Happy Cat is not just a Meme Token Project. But we aim to bring many Blockchain Products and features to our Investors. Here is a glimpse of what is all about to come.

Phase 0:

- Market Research and Ideation
- Concept, Design & Whitepaper Preparation
- Website, Social Media handles Launch

Phase 1:

- Pre-Launch Marketing & Influencers Onboarding
- WL Contest and Public Pre-Sale Launch
- Go-Live on Uniswap DEX

Roadmap - Contd...

Phase 2:

- CMC & CG Listing
- Huge Marketing Push, including Asian & Chinese Markets
- Kick Off Community Contests
- Start BuyBack & Burn
- Start Mission Charity – Donations to Cat Shelter
- Initial AI Tool launch

Phase 3:

- 5000+ Holders
- More Marketing push
- First-ever Memecert (Meme Concert on Metaverse platform)
- Staking & Farming Platform Launch
- Cross Chain Liquidity
- Buyback & Burn – continues...

Roadmap - Cont'd...

Phase 4:

- Tier 1 CEX Listing
- Happy Cat NFT
- Happy Cat ORDINALS
- Mission Charity, Buyback & Burn continues....

Phase 5:

- Own Blockchain - HCT Chain
- Advanced AI Tools Launch
- Happy CAT Launchpad

**** We may modify/add new items in the Roadmap so as to keep up with the latest trends in the Blockchain and Crypto Industry.**

Security and Audit

We take Security very seriously at Happy Cat. Hence our Smart Contract and all future Technology Products will undergo rigorous Audits by External Partners.

As of now, our Smart Contract has been audited by Pinksale
You can find the Audit Report on the following Link

All our future products (like Staking Platforms, NFT Stores, etc) will undergo rigorous Audit as well.

Staking and Farming Platform

With Staking & Farming, you can put your digital assets to work and earn passive income without selling them. It is a method of earning rewards or interest by depositing your cryptocurrency into a pool with other users.

We will introduce various Farming Pools for LP Tokens and as well as Single Tokens with lucrative APRs. These pools will be available to all token holders, allowing them to earn more tokens over time.

We will offer following types of Pools.

- LP Tokens – if you wish to provide liquidity to our token trading pair, you can stake these LP tokens to earn lucrative APRs. In addition, you will also earn Tx fees for these LP tokens
- Single Tokens – You can take part in any of the Pools with different locking period. We will also offer unlocked Pool which will have a lower APR.

* For LP Tokens, be aware of IL losses

**There will be no cost involved in participating in any of the Pools, however you will have to cover the Gas Fees as charged by the respective BlockChain.

MEMECERT - Concert related to Memes

MEMECERT - The first ever Meme concert in Crypto Space.

The team has come up with a new concept to host the world's first ever Concert related to Memes.

We plan to host this in any one of the popular Metaverse platform.

The artist will be decided later on the community demand and many popular influencers will be partnered to do watchparty on multiple social media, streaming platforms.

The fees will be set to negligible amount as to attract many visitors and all the earnings from the concert will go to the charity wallet or directly to a Cat shelter.

NFT Platform

With the launch of our NFT platform, users will be able to trade our very own NFT collection.

In later stages, Creators can mint their own digital assets as NFTs, establishing verifiable ownership and authenticity on the blockchain.

Our platform will offer a vibrant marketplace where verified creators can showcase and sell their NFTs directly to collectors. The marketplace is designed to be intuitive, enabling easy exploration and discovery of unique digital assets.

All transactions and interactions within our platform are governed by smart contracts, ensuring transparency, immutability, and trust. Smart contracts facilitate seamless peer to peer transactions and automate processes such as royalty distribution to creators.

Happy Cat Ai Tool

The team will be launching its own AI tool - HappyCAT AI.

The AI tool will be able to do the following :

1. **Cat Image Generation:** HappyCAT AI tool will generate realistic cat images based on provided inputs or descriptions.
2. **Cat Breed Recognition:** HappyCAT AI tool will analyze images of cats provided and identify their breeds. The user will need to upload a image of the cat.
3. **Cat Behavior Analysis:** HappyCAT AI tool will help analyze and interpret cat behavior based on images or videos provided. It will detect various behaviors like playing, sleeping, eating, or signs of distress, providing insights into a cat's well-being.

Happy Cat Ai Tool - Contd

4. Cat Health Monitoring: HappyCAT AI tool will be able to analyze health-related data, such as vital signs, symptoms, or images, to provide preliminary assessments of a cat's health condition. This can help owners monitor their cat's health and detect potential health issues early on.

5. Cat Chatbot : HappyCAT AI chatbot will be able to simulate conversations with users and provide information or assistance related to cats. They can answer common questions, provide advice on cat care, or offer general knowledge about cats.

****The different features will be developed and will be available over a period of time and not initially.**
